

To whom it may concern:

It is my understanding that 04-233 considers a question that will give priority to low power stations, creating a situation where nationally broadcasted programs such as K-Love may be at risk. I am here to tell you how K-love serves me locally even though it is a national program. K-love has segments where it addresses local events, and impacts people's lives on a personal level. As a listener supported radio station, its centralized administration saves me money since costs can be kept down and dispersed over a broad base of supporters. Since K-love has impacted people's personal lives due to its inspirational nature, those lives, in turn, impact the local community through their changed focus and involvement.

If K-love were displaced, it would impact the local community adversely since many of the inspirational segments would need to be displaced by advertising since I doubt that any local radio station of like nature would be able to repeat its listener supported style affordably.

Obviously I believe that the service provided by K-love is in the public interest since I support the station financially. Allow me to explain why. I believe that Jesus Christ is who he said he is: the Savior of the world from its mistakes against the creator. K-love, through the vehicle of music, testimonials, and brief humorous dramatizations reaches people on many local levels as well, or better than any low power broadcaster due to its total dedication to its subject matter: Christ and his followers. There is a local station which attempts to do similarly, but since it is forced to pay for its services through advertizement, is a shadow of what I experience via K-love's outreach. There have been others, as well, with the same end result. K-love's service to our community is necessary and must not be eroded by enacting 04-233.

Thank you for your time.
and humorous
